

Description

Soleado

Minimal clutter design, thanks to a single central pole onto which the two parasols are fitted. Ideal for both commercial use (hotels, restaurants...) and residential use (villas, private gardens). Independent crank handle opening mechanism for each parasol, which can be closed even in presence of furniture beneath the umbrella. The ribs can be replaced individually without needing to disassemble the entire structure and the canopy fabric is easily removed for maintenance or replacement. Aluminium framework and stainless steel hardware. A stabilizer bar assures higher parasol stability in very windy conditions. Soleado can be supplied with a freestanding base or in-ground mount.

Materials

Solution dyed Acrylic Fabric

Designed for outdoor use, the solution (spun) dyed acrylic fabric resists salt water, chlorine and any type of harsh climate. Colours do not bleed and remain vibrant for a long time. A specific treatment makes the fabric water repellent, mould resistant and protects it from staining. This type of fabric resists the most extreme conditions and is suitable for year-round use in gardens, terraces, pool sides or on-board boats. It's definitely the top choice canopy fabric to select for your Product. UPF 50+ (UV Protection Factor) 280 gr/m2.

Airfim Fabric

Waterproof fabric assuring total protection from rain, which does not even permeate the stitches. A stain-resistant treatment contributes toward a better dirt resistance of the fabric, too. A regular wash with a neutral cleaning agent guarantees a long lifespan. UPF 80 (UV Protection Factor) 190 gr/m².

Product Sheet

Finishes

The materials used have been specifically selected and treated to maintain our products durability and consistency over time. The lumber we source is the best available to guarantee structural integrity and strength of the product. The aluminum profiles are powder coated or anodized to ensure a longer durability in time. The colors may differ from the real ones.
